

Follow these 5 easy steps to set up and use your portable power station

1

### Turn on the Unit

- Press and hold the Main Power button for 1 second to turn on
- Hold for 2 seconds to shut down (won't shut down while charging)
- Tap the button to activate the display

2

### Power Your Devices

- Press button for AC output (4000W continuous / 8000W surge)
- Press DC button for DC output / USB button for USB output
- Keep vents clear — internal fan auto-starts when hot

3

### Recharge the Power Station

- Level 2 EV charging station ~ 1 hour (cable available for hire)
- Mains AC ~ 3 hours (cable supplied)
- Generator ~ 4 hours with 1200W input (genset available for hire)

4

### Use Safely

- Keep dry — never expose to rain or moisture
- Allow airflow — don't block fan or vents
- Keep out of direct sun and never leave in a hot parked car

5

### Download the App (optional)

- View real-time input / output power
- Check battery percentage and time remaining
- Download from the **App Store** or **Google Play**

## Troubleshooting Tips

-  Overload? → Turn off outputs, unplug, and restart
-  No charging? → Check cable, try alternate port or reset breaker
-  Too hot? → Let the unit cool down before retrying
-  AC Timeout – Prevent idle shutoff using the app settings
