

Follow these 5 easy steps to set up and use your portable power station

1

Turn on the Unit

- Hold the main power button to switch on or off
- The LCD screen will turn on when active and will dim after 30 seconds
- The power station itself will stay on until you switch it off

2

Power Your Devices

- Press AC, DC, or USB buttons to enable each output
- Ensure cooling vents are clear — fan will auto-activate if needed

3

Recharge the Power Station

- AC Wall Charger (included) — fastest recharge (< 90 minutes)
- Car Charger (12V) ~16 hours so not optimal
- Solar Input (XT60 port) ~4 hours with a 400W panel (no regulator needed)

4

Use Safely

- Keep dry — never expose to rain or moisture
- Allow airflow — don't block fan or vents
- Keep out of direct sun and never leave in a hot parked car

5

Download the App (optional)

- There is no app available for iTechWorld portable power stations
